CtrlCrossTalkID

Manage the CrossTalk workflow with InDesign

CtrlCrossTalkID enables InDesign users to manage our popular CrossTalk workflow. CtrlCrossTalkID makes the collaboration between InDesign and InCopy users transparent. In addition it will refine the initial InCopy workflow to better suit the needs of publishers, agencies, inhouse production and other collaborative workgroups.

Enable or disable the CrossTalk workflow.

Lock stories on any page.

CrossTalk workflow – Layout and text team working together

CtrlCrossTalkID enables InDesign users to manage our popular CrossTalk workflow. CtrlCrossTalkID makes the collaboration between InDesign and InCopy users transparent. In addition it will refine the initial InCopy workflow to better suit the needs of publishers, agencies, inhouse production and other collaborative workgroups.

Art directors and copywriters can work on the same document, the copywriter works in Adobe InCopy, a specialized text editor, while the art director works in Adobe InDesign with full control of the document and its layout.

With CtrlCrossTalkID, InDesign users can manage stories in a document by locking them to prevent the InCopy user from further modifying approved texts, while still allowing them to complete additional work on the same file. CtrlCrossTalkID even allows the InDesign user to completely disable the CrossTalk workflow so that the InCopy user can no longer edit the text when a document has reached its final stage.

Key Features: (InDesign with CtrlCrossTalkID)

- Enable/Disable the CrossTalk workflow
- Lock stories on pages
- Lock all stories on masterpages

Why InCopy with CtrlCrossTalk?

- No need for expensive layout software to edit text
- Everyone in the workgroup can access and edit text in the document
- Use the existing file structure of the server
- Optimal work process without complex systems

System requirements:

CtrlCrossTalkID is a plug-in for Adobe InDesign. Current users of InDesign CS3, CS4 or CS5 can immediately benefit from CtrlCrossTalkID without any modifications to their system.
